

Midterm - Build a multi-page Hobby Site as a single html file

Start Assignment

- Due Mar 15 by 11:59pm
- Points 100
- Submitting a text entry box or a website url

You will be making a website for a hobby/interest of yours that is files, but will appear as multiple pages.

UNLIKE MANY OTHER ASSIGNMENTS, THERE ARE NO LATE SUBMISSIONS OR RESUBMISSIONS FOR THIS ASSIGNMENT, PLEASE PLAN ACCORDINGLY.

You may/should use AI for this :)

Think of an activity that you are passionate about. If you don't have one, figure one out and fake it.

- Make a subfolder in your course folder called **hobby**
- Within that folder create an **images** folder (and others as you see fit).
- Create an **index page** that includes all the normal items our pages have had so far – do not use includes.
 - **header/main/footer** within the body
 - **header tag** should have an h1 with the name of the hobby
 - **footer tag** should include validation buttons (HTML, CSS, accessibility) and a link to your design firm as you did with the course website.
 - The page must validate with no warnings/errors (HTML, CSS, accessibility).

Use an **embedded stylesheet** since this is all one page.

- Styling should follow **CRAP principles**.
- No Times New Roman, no generic blue underlined links, no plain white background, no plain black text.
- Color scheme must be different than your main site pages.

Create sections (using `<section>` tags) that act like different “pages” for your hobby site:

- **Who** (About / About Me / Who We Are)
- **What** (Home page – loads first, explains the hobby)
- **When** (Best Times / Schedule / Seasons)
- **Where** (Best Locations / Places)
- **How**
- **Why**
- **AI Prompts** (if you used AI for code or text, show prompts here. If only images were AI-generated, include a comment in your submission that says “I only used AI for images.”)

Each section should:

- Have an h2 heading.
- Contain **at least three items** (e.g., paragraphs, figures, tables, forms, slideshow).
- Include at least **one figure** (image + caption + italicized paragraph explaining the AI prompt used).
- Images must be your own, AI-generated, or open source. Keep a consistent style (e.g., all photorealistic or all cartoon).
- Resize large images and maintain aspect ratio to avoid long loading times.

Navigation:

- Add links in the header/nav to switch between sections.
- Use CSS/JS so only the selected section is visible at a time (like a single-page app).
- Use a unique divider symbol (emoji or special character) different from your other pages.
- The **What (Home)** section should be the default visible page.

Lastly:

- Add this new page to the secondary menu on your main site as “**Hobby**” so it’s accessible from your main site.
- Create a favicon for your page using a tool like <https://favicon.io/>  [\(https://favicon.io/\)](https://favicon.io/) or something similar of your choosing.
- Submit the link:
https://webpages.charlotte.edu/UNCCID/itis3135/hobby_ [\(https://webpages.charlotte.edu/UNCCID/itis3135/hobby_\)](https://webpages.charlotte.edu/UNCCID/itis3135/hobby_)

Midterm Rubric 2026

3/7

Criteria	Ratings				F
user to click and view different sections of the hobby page. The icons used to divide the "links" should be an icon that's different than the ones from your main site	Has h1 tag with the name of the hobby, navigation like bar exists and has an icon to divide these "links"	Something is missing, either it's the h1 tag with the hobby or the navigation like bar	h1 tag and navigation bar does not exist		
Hiding Sections accordingly Found a solution using css and/or JS that hides all sections except the one you have clicked. The idea is to mimic the nav bar in your main site, the user will click a &quot;link&quot; in your nav tag that will hide all the sections on the page and ONLY display info of the section of choice. So if you click on the word &quot;Best locations&quot; in the nav bar, it will only display the &quot;best locations&quot; section on the page and hide the rest so the user can't scroll to see it.	17 pts Full Marks Everything works as it should. When a section is picked, all the other sections are hidden and cannot be seen by the user until they click something else.	8.5 pts mid-marks When a section is picked, the user is taken to that section where it looks like the content is the only part of the page but the user can still scroll up and down and see parts of the other sections. Sections are not hidden correctly	5 pts Kind-of Function does not work at all, but an attempt was made	0 pts No Marks This logic of hiding sections were not implemented in the website submitted	17
Section What This section is the &quot;homepage&quot; of the hobby site and should be the first section shown when visiting the site. This section should have an h2 tag that tells the user the purpose of this &quot;What&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page, for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has 1-2 things on the page rather than 3	0 pts No Marks This does not exist or if it does, it does not follow the "what" category at all	4
Section Who This section should have an h2 tag that tells the user the purpose of this &quot;Who&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page, for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has 1-2 things on the page rather than 3	0 pts No Marks This does not exist or if it does, it does not follow the "who" category at all	4
Section When This section should have an h2 tag that tells the user the purpose of this &quot;When&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page,	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has	0 pts No Marks This does not exist or if it does, it does not follow the "when" category at all	4

Criteria	Ratings				F
counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1-2 things on the page rather than 3		
Section Where This section should have an h2 tag that tells the user the purpose of this &quot;Where&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page, for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has 1-2 things on the page rather than 3	0 pts No Marks This does not exist or if it does, it does not follow the "where" category at all	4
Section How This section should have an h2 tag that tells the user the purpose of this &quot;How&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page, for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has 1-2 things on the page rather than 3	0 pts No Marks This does not exist or if it does, it does not follow the "How" category at all	4
Section Why This section should have an h2 tag that tells the user the purpose of this &quot;Why&quot; section. Also, this page has at least 3 things, with one of the things being a figure (img and figcaption). To reference the instructions, a thing is either a table, form, paragraph, and a figure, etc... A figure is an img and figcaption. A table counts as a thing. A form counts as a thing. A slideshow counts as a thing. A figure counts as a thing. Make it look nice and be creative.	4 pts Full Marks There are 3 things and the Figure is a figure tag with an image and a caption. If the figure had an AI image, the figure would be followed by a italicized paragraph that has the prompt given to generate the AI image. The content of the "things" are well written and has a good chunk of material	2.5 pts mid-marks Though it has 3 things, and the figures follow the requirements of having an image and a caption, it's lacking content on the page, for example (1-2 sentence for a paragraph, the table only having one row, the form having only 1-2 inputs.)	1.5 pts okay=marks Missing some of the requirements like the figure missing the caption and if it is an AI image, missing the prompt. This page also only has 1-2 things on the page rather than 3	0 pts No Marks This does not exist or if it does, it does not follow the "why" category at all	4

Criteria	Ratings						F
Section AI-Prompts This section should have an h2 tag that tells the user the purpose of this &quot;AI Prompts&quot; section. If you used AI to only generate the images, you don&#39;t have to worry about adding this section but if you used AI for other things, maybe JS, CSS, or even HTML. The content should go here. Add all the prompts used to create your page and make it nice. We should be able to read and follow along the page for what you did to finish this assignment. Please add ALL prompts and make sure to tell us which AI-model that you used. If you only used AI for images, you need to put in the comment section of your submission that &quot;I only used AI for images so I don&#39;t need the AI Prompts section&quot; No points if you did not write this as a comment during submission and this section does not exist	6 pts Full Marks This section exists and has the AI model and the content nicely formatted so that the TA can easily see what prompts were used to get your finished website. If you only used AI for images, you need to put in the comment section of your submission that "I only used AI for images so I don't need the AI Prompts section" No points if you did not write this as a comment during submission and this section does not exist	4 pts full-ish Though this section does not exist, throughout the page, there are comments/paragraphs that show prompts of the AI	2.5 pts mid-marks This section exists and has the AI model but the content is not formatted so that the TA can easily see what prompts were used to get your finished website.	2 pts okay=marks This section exists and has the AI model but it is obvious that it is missing some extra prompts for the end result.	1 pts No Marks This does not exist or if it does, it does not follow the "AI-Prompts" category at all and the student did not comment "I only used AI for images, not anything else"	0 pts no marks The student commented "I only used AI for images so I don't need the AI Prompts section" but obviously used AI to generate their code/content other than the images	6
Footer The footer should have your design firm link and the 3 validation links, HTML, CSS and Disability/Accessibility	5 pts Full Marks Footer tag should have validation buttons (images) or stylized text for html, css, and disability/accessibility. Right above it, there should also be a p tag with the words "designed by" and a link to your design firm website	4 pts one-off Design firm link does not work but it is found at th efooter	2.5 pts mid-marks Footer is missing one out of the 2 elements	0 pts No Marks Footer does not exist			5

Criteria	Ratings					P
Validation These links work in the footer and there are no errors shown when checking the HTML, CSS, and disability/accessibility validation links	7 pts Full Marks Validation links in footer work properly and No errors in all 3 categories of validation, HTML , CSS, and disability/accesibility	5.5 pts Almost These links DO NOT work in the footer but the student has no errors in all 3 categories	4 pts mid-marks 2 out of the 3 catagories has no issues after checking the validation	2 pts lower-marks 1 out of the 3 catagories has no issues after checking the validation	0 pts No Marks there are errors in every category when validating the page	7 p
Image Attribution If the student used any AI images, there is a paragraph right below the figure and figcaption that is italicized and is the prompt used to generate the image. The images should be in relatively the same style (e.g. all pages photorealistic, or all pages cartoon-ish).&lt;br/&gt; Make sure we know the prompt you used and the source if you use AI.&lt;br/&gt; &lt;br/&gt; You can also use images that you take, creative commons 0 images, free use, or government images. Make sure we know where they came from.	3 pts Full Marks If the user used AI images, the images have the same styling and the written prompt in italics underneath it. If the user did not use any AI images, then they still get full points			0 pts No Marks Your ai images do not follow the same category and some of your images are missing that paragraph right below that is italicized and says the prompt to get that image		3 p
Added the Hobby page in you secondary Nav in your main site In your main site, the link to this page can be found in your secondary nav	5 pts Full Marks you did this.	2.5 pts mid-marks Found on your main site but not in the secondary nav bar...		0 pts No Marks you did not		5 p
Favicon Create a favicon for your page. Use something like https://favicon.io/  (https://favicon.io/) or create one on your own.	2 pts Exceeds Favicon is present and functions.	0.5 pts Below An attempt was made, however it does not function. (Favicon does not display)		0 pts No Evidence No favicon exists		2 p
Total Points: 100
